

Cerberus Technologies provides technology solutions to the resource, critical infrastructure and government sectors.

Project construction, management, service and maintenance are services coordinated from the Perth, Western Australian office.

Our operations provide innovative and sustainable technology-based solutions to optimise the value and performance of our clients' operating assets across multiple

## Our Quality Policy

**Cerberus Technologies is committed to:**

- Maintaining our Management to provide employees and interested parties with the leadership, guidance and instruction to ensure our service provision is consistent throughout our operations
- Providing the best possible outcome with the least amount of risk
- Establishing clear objectives and plans that support our journey toward business excellence
- Systematically monitoring progress and reviewing performance data against established objectives and relevant performance indicators
- Promoting sustainable practices within our supply chain and reduce our broader environmental impacts
- Continually improving quality and striving for best practice through collaborative approaches with all stakeholders
